Le rendu peut varier en fonction de la matière première (cires ou paraffine) et de la quantité de colorant utilisées. En effet, lorsque ces colorants sont utilisés avec des cires, le rendu est pastel. Lorsque qu'ils sont utilisés avec de la paraffine, le rendu est fluorescent.

The result can vary depending on the raw material (waxes or paraffin) and the colourant quantity used. Indeed, if these colourants are used with waxes, the result will be pastel. If they are used with paraffin, the result will be fluorescent.

El acabado puede variar según la materia prima (ceras o parafina) y de la cantidad de colorante utilizadas. En efecto, si se utilizan esos colorantes con las ceras, el acabado será pastel. Si se utilizan con la parafina, el acabado será fluorescente.

Il risultato finale può variare a seconda della materia prima (cere o paraffina) e della quantità di colorante utilizzate. In effetti, se si utilizzano questi coloranti con cere, il risultato sarà color pastello. Se si utilizzano con la paraffina, il risultato sarà fluorescente.

Het eindresultaat kan variëren afhankelijk van de grondstof (wax of paraffine) en de gebruikte hoeveelheid kleurstof. Als deze kleurstoffen met wax worden gebruikt, zal het resultaat pastelkleurig zijn. Als ze met paraffine worden gebruikt, zal het resultaat fluorescerend zijn.

Das Ergebnis kann je nach Rohstoff (Wachs oder Paraffin) und der verwendeten Farbstoffmenge variieren. Wenn diese Farbstoffe mit Wachsen verwendet werden, ist das Ergebnis pastellfarben. Wenn sie mit Paraffin verwendet werden, wird das Ergebnis fluoreszierend sein.

Le rendu peut varier en fonction de la matière première (cires ou paraffine) et de la quantité de colorant utilisées. En effet, lorsque ces colorants sont utilisés avec des cires, le rendu est pastel. Lorsque qu'ils sont utilisés avec de la paraffine, le rendu est fluorescent.

The result can vary depending on the raw material (waxes or paraffin) and the colourant quantity used. Indeed, if these colourants are used with waxes, the result will be pastel. If they are used with paraffin, the result will be fluorescent.

El acabado puede variar según la materia prima (ceras o parafina) y de la cantidad de colorante utilizadas. En efecto, si se utilizan esos colorantes con las ceras, el acabado será pastel. Si se utilizan con la parafina, el acabado será fluorescente.

Il risultato finale può variare a seconda della materia prima (cere o paraffina) e della quantità di colorante utilizzate. In effetti, se si utilizzano questi coloranti con cere, il risultato sarà color pastello. Se si utilizzano con la paraffina, il risultato sarà fluorescente.

Het eindresultaat kan variëren afhankelijk van de grondstof (wax of paraffine) en de gebruikte hoeveelheid kleurstof. Als deze kleurstoffen met wax worden gebruikt, zal het resultaat pastelkleurig zijn. Als ze met paraffine worden gebruikt, zal het resultaat fluorescerend zijn.

Das Ergebnis kann je nach Rohstoff (Wachs oder Paraffin) und der verwendeten Farbstoffmenge variieren. Wenn diese Farbstoffe mit Wachsen verwendet werden, ist das Ergebnis pastellfarben. Wenn sie mit Paraffin verwendet werden, wird das Ergebnis fluoreszierend sein.
