Le rendu peut varier en fonction de la matière première (cires ou paraffine) et de la quantité de colorant utilisées. En effet, lorsque ces colorants sont utilisés avec des cires, le rendu est pastel. Lorsque qu'ils sont utilisés avec de la paraffine, le rendu est fluorescent.

The result can vary depending on the raw material (waxes or paraffin) and the colourant quantity used. Indeed, if these colourants are used with waxes, the result will be pastel. If they are used with paraffin, the result will be fluorescent.
